

Protocol and analysis-plan chronology

G09 — original estimand

Weighted UQ + Greek transport
UQ anticipated n=27
Hard gate $n \geq 25$
Invalid author key → STOP

G10 — public recovery

Public GEO/source-table crosswalk
21 predictor-paired patients
19 outcome-complete patients
Original G09 gate not met

G11 — amended plan

Frozen before outcome-linked execution
Greek cohort primary
UQ descriptive stress test
G09 never resumed or reweighted

Study identity: analysis-plan-locked post-deviation secondary transport audit
